## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmidt (4,946,454).

Schmidt discloses a disposable wearing article comprising a body fluid absorbent assembly 10 having transversely opposite side edges curving in a generally U-shape, as shown in figure 4. The body fluid absorbent panel 10 has a pair of first folding guide lines 20 extending from a midpoint of a crossline and extending across the crotch region to form a first crossing angle. The absorbent panel 10 further comprises second folding guide lines 26 forming a second crossing angle. A pair of folded portions are folded inward, as shown in figure 3, such that the first non-folded portion 36 has a relatively small extent and the second non-folded portion 34 has a relatively large extent, as shown in figure 4.

With respect to claim 2, the first crossing angle is larger than the second crossing angle, as shown in figure 1.

With respect to claim 3, the crossline is placed aside toward the front region 34, as shown in figure 3.

Art Unit: 3761

With respect to claim 4, the first crossing angle is in a range of 35-60° and the second crossing angle is in the range of 10-30°, as shown in figure 1.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schmidt (4,946,454).

Schmidt discloses all aspects of the claimed invention with the exception of the distance by which the crossline is placed toward the front region of the article. Schmidt shows in figure 3 the crossline placed toward the front region of the article. It would have been obvious to one of ordinary skill in the art at the time of invention to place the crossline toward the front region by 10-50 mm, since it has been held that here the general conditions of the claim are disclosed in the prior art, finding the optimum or workable ranges involves only routine skill in the art. *In re Allen*, 105 USPQ 233.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 4,182,334; 3,968,799; 3,848,595; 3,774,610 disclose absorbent articles having folding guide lines.
